\$6.95

All our Carpets are made, lined and laid free—no charge for waste in cutting to match figures. This means a saving of 15c to 25c a yard.

GROGAN'S

COLORSCHOOLS SHOW HANDWORK

Exhibit Being Made by Boys and Girls at the Miner Normal.

ARTICLES ON DISPLAY ARE USEFUL OBJECTS

Congress Will Be Asked for Appropriation to Extend and Maintain the Work.

Persons interested in the education of colored youth in Washington have an opportunity this week to see a quadruplex exhibit showing what is being done here in the way of training colored boys and girls. The fourfold exhibit is at the Miner Normal School, Georgia avenue and Euclid street northwest. The greater portion of it is work done on the school playgrounds during the summer; added to this are models showing dairy, water supply, housekeeping and other methods, sanitary and insulating. The remaining two phases are in one sense not an exhibit of a formal nature, being only the regular arrangement of material for study by students at the normal school and including the courses in domestic and other sciences, such as botany, zoology and psychology.

Interested persons will be made welcome at the school and shown the exhibits and school equipment. It is planned to have the specimens of all characters remain on view for about a week longer.

"Service" Is the Motto.

No group of the exhibit is more interesting, probably, than the display of playground work. This represents all of the industrial activities of the five colored school grounds under Miss Anita J. Turner. "Service" is the motto for all work turned out—that is, it must be of a character and structure that allows its use.

For instance, on display are all sorts of baskets, well made and attractive. There are also crocheted, crocheted sacks and booties, aprons, little dresses, collars, dollies, hats, napkin rings and hammocks. Several girls attending the play centers brought their dolls and dressed them. Play aprons for children were made by the youngsters and decorated with subjects dear to the hearts of little ones—the three bears, the cow that jumped over the moon, rabbits, birds, camels, elephants and Mother Goose.

One especially attractive display is for table use. It includes a centerpiece adapted for the joint use of flowers and fruit; dollies, reed napkin rings and coasters.

Because of the lack of money for material, work of this sort is limited. It is hoped this year that Congress will appropriate a sum for carrying it on, so that the maintenance money no longer will have to be raised through entertainments and other similar means.

Sanitation Exhibit.

How flies and mosquitoes carry disease is one of the phases treated in the exhibit on hygiene and sanitation. The models in this were made by junior students of the school, and will be used in instructing grade children as to the methods of keeping well.

Right and wrong kind of dairies, right and wrong methods of supplying houses with drinking water, as well as a model of the District's water supply plant, right and wrong methods of ventilating houses, proper methods of disposing of garbage and trash, and how children may aid in keeping communities in which they live clean and healthful are included among the models displayed.

One of the points of interest about this part of the quadruplex exhibit is that the cost of the material used was but slight. Old boxes, pasteboard, clay and illustrations cut from magazines were all used to good purpose. Miss Jessie Wormley of the normal faculty, directed the students.

Domestic Science Section.

Students taking the domestic science course under Miss Helen Irving have compiled exhibits showing the various uses to which cotton is put, as well as its by-products. From the raw material to various finished products is shown through actual material and pictures, not only of cotton, but also of linen, wool, hemp, ramie, jute and silk.

So far as is possible material and information furnished by the United States government is used. The students made crayon pictures, showing various nutritive materials and units contained in foods.

Some of the most modern pieces of apparatus are on display in the laboratory under Charles M. Thomas, who has charge of the sciences at the school. The equipment for psychology tests is "up to the minute" and serves a double purpose—for instructing the embryo teachers in psychology and how they can best teach those who come under them, and for carrying on psychological experiments, particularly with defective children.

Although the material used in the science department is always out, being in constant use, it is attracting wider attention than ordinarily, in connection with the other exhibits. Teachers attending various institutes recently have inspected it, and have its uses explained to them by Mr. Thomas.

GIVES INVITATION LIST FOR SPECIAL PEACE SHIP

Henry Ford Says He Has Received Acceptances From Prominent Men and Women.

NEW YORK, November 26.—Henry Ford has given out copies of replies he has received to telegrams he sent to 100 prominent persons, asking them to leave with him December 4 for Europe on a peace mission. Mr. Ford had telegraphed that he proposed to take leading American men and women to Copenhagen, Stockholm and Copenhagen, where they would meet others interested in urging peace.

Mr. Ford said he had received acceptances from Thomas A. Edison, John Wanamaker, Miss Jane Addams, Miss Helen Keller, Mrs. Anna Garlin Spencer, Meadville, Pa., and Frederic C. Howe, commissioner of immigration.

Mr. Ford announced that Gov. Clark of Iowa telegraphed that he wanted to know how long the trip would take. Gov. Williams of Oklahoma regretted that he could not go, and Gov. Brewer of Mississippi, Goldsborough of Maryland, Craig of North Carolina, Perris of Michigan and Stuart of Virginia, wired that they would be unable to make the trip. Prof. George H. Meade of Chicago University said he desired a clearer idea of the undertaking. Judge Julian W. Mack of Chicago said he was too busy and John Burroughs, the naturalist, doubted his ability to join the party. "Because the doctor says I am not well enough,"

TARIFFS NOT REMITTED ON YULETIDE PRESENTS

Tax Collected in Every Season, Department of Commerce Informs Inquirers.

Christmas presents which will have to cross international boundary lines are responsible for a great number of inquiries which are being received by the Department of Commerce as to tariff rates in the various countries, and how the rates can be prepaid. While the bureau tells its correspondents that there is no direct way of paying foreign tariffs here, it pointed out that the express companies usually handle this problem.

Difficulty is being experienced in answering some of the correspondents because they do not specify the articles that are to be sent, some merely asking the tariff on "Christmas presents." The tariff law, it is pointed out, recognizes no Christmas.

The writers of these letters, which come from every part of the country, are particularly interested in tariff rates which must be paid on gifts in the lands to which they are sent. Many express regret that there should be such a thing as a foreign tariff in the season of generous giving. Some indicate that they think the charges are really omitted. They believe that during the holidays the barriers are torn down.

Tax Always Collected.

The truth, however, must be told in replying to these inquiries, and the bureau is compelled to inform its correspondents that whatever the customs tax is in any foreign land on any class of presents that tax is collected in every season.

Although there is no exemption from customs charges for Christmas gifts there are some conditions under which certain gifts going from country to country may escape payment. Some governments rule that wedding presents brought in by subjects shall not be taxed. Some also exempt possessions that are part of an inheritance. But the season of universal giving is not on the tariff calendar.

GERMANS IN CHINA'S ARMY.

Officers Also Said to Be Engaged in Arsenal of Country.

PETROGRAD, November 26.—The assertion is made by the Peking correspondent of the Novaya Vremya that German and Austrian officers are now being employed in the Chinese army, and particularly in the arsenal.

Germany Closes Swiss Frontier.

GENEVA, via Paris, November 26.—Germany has again closed the Swiss frontier from Basel to Constance, and will probably remain closed for a week. The reason for this action is unknown.

OBJECTS TO THE THEME OF MINISTER'S SERMON

Thanksgiving Services Practically Broken Up by Denunciation of Preacher's Reference to Germans.

BALTIMORE, Md., November 26.—The American says: Objection to the manner in which Rev. S. Reese, pastor of Catonsville Methodist Episcopal Church, spoke of the Kaiser and his subjects during a union service yesterday in Catonsville Presbyterian Church, practically brought the meeting to an end.

In his sermon, it is stated, Rev. Mr. Reese said many severe things about the Germans and their share in the great European conflict. His sermon was interrupted by occasional murmurs of dissatisfaction.

Voicing the sentiments of the congregation former State Senator John Hubner arose and objected to the topic and the preacher's remarks. "No German in the church with good red blood in his veins could sit here quietly and listen to your remarks in reference to the German race," many of which I know to be untrue, without taking offense at your unjust criticism, and I think it is a sin and a shame for you to preach such a sermon on Thanksgiving morning to Christian people. It should be kept out of the churches and, indeed, out of the nation."

BIG PILE-DRIVING JOB.

Sticks Sixty Feet Long to Be Used at Norfolk Navy Yard.

The Clarke & Winston Company, who have a contract for the construction of the pile foundations for a new marine barracks to be built at the Norfolk navy yard, have shipped the sticks of pile-driving which will be used in the work, to Portsmouth, Va.

Early in the coming week actual work of driving the piles will be started, and many of the 800 piles to be used in making the land solid enough for the erection of the big building will be over sixty feet in length. In preparation for the work the local firm built a pile driver with leads sixty-five feet high. Clarke & Winston now have machines and men at work on the foundations of the immigration building which is to be erected at Baltimore by the United States government. It is stated that about a hundred piles will be driven on the work and that several weeks will be required to complete it.

Will Elect Officers Monday.

Officers for the current year are to be elected at the first meeting of the season of the North Washington Citizens' Association, Monday evening at 8 o'clock in the Gage School, 24 and U streets northwest.

CAMPAIGN UNDER WAY FOR THE WALSH REPORT

Circular Has Been Sent Out to the Mine Workers of the United States.

"The same men who dragged the truth about Colorado from Rockefeller's unwilling lips are on the job ready to insist that Congress do something to remedy the evils that Walsh and his associates exposed."

This is part of a statement sent out to mine workers' labor organs by the new "committee on industrial relations," which has established headquarters in the Southern building. The movement in the "committee" is Frank P. Walsh, who was chairman of the government commission on industrial relations. The "committee" is not an official organization, nor does it claim to be one. Representatives of the organization at the Southern building said today that it was supported by labor organizations and that its prime function is to induce Congress to enact laws favorable to mine workers.

Circular Is Sent Out.

A printed circular issued by the "committee" states that the final report of the commission on industrial relations will be laid before Congress in December. The immediate legislative recommendations include a proposal to contribute the printed hearings of the commission, together with the final report.

The circular states: "The committee, while taking no part in the discussion regarding the size of the army and navy, will endeavor to keep to the forefront certain fundamental principles that should govern in any program of preparedness. These are:

(a) There must be no profit in the

killing of men. All munitions, warships and military supplies should be manufactured in government plants. The removal of private profits in this industry strikes down the most sinister interest in the promotion of war.

(b) There must be no military caste in this country. The militia system of any new system of citizen soldiery must be organized on a democratic basis, with equal opportunity for wage earners and those without means to obtain commissions on a merit basis, and the use of these forces must be confined to the national defense, and they must never be used against workmen on strike.

Tax on Inheritances.

"To urge that, if additional revenue is required for national defense or other needs of the government, it shall be secured from taxes on inheritances and incomes, as outlined in the report of the commission, and not by heavier taxes upon the necessities and comforts of the workers, such as sugar, tea, coffee, tobacco and the like, nor by bond issues which are a continuing burden upon the producers."

"To secure the passage of uniform laws providing for the selection of jurors by an impartial method from a list containing the names of all qualified voters. In a majority of the states and universally in federal courts, jurors are selected in such a manner as practically to exclude the workers."

"To secure the enactment by Congress of laws prohibiting the interstate shipment of armed guards and strike breakers, and of cannon, machine guns, or other similar weapons, except when consigned to the military authorities of the state or nation."

PLEASURE CRAFT LAID UP.

Work of Hauling Out Boats for the Winter Is Started.

The hauling out of pleasure boats for the winter has been started at Regan's boatyard, foot of 13th street southwest. The launches Rags, belonging to Capt. Latham and the Wise Girl have been taken from the water and placed in winter quarters ashore.

A large unnamed launch belonging to a local owner, a new boat at Regan's, also is out on the railway to be laid up ashore until the coming of the next boating season. These vessels will be shrouded in canvas to protect them from the weather, and during the winter will be hauled out, so as to be ready to go overboard as soon as ice making time is past.

A number of the larger boats at the Regan yard will be left in the water all winter, but before ice comes will be hauled out to plug up outboard openings and to drain all piping to prevent freezing.

Former Cadets to Organize.

Former high school cadets have been asked to attend a meeting Sunday afternoon at 3 o'clock in the Perpetual building, 11th and E streets northwest, to organize a military association. Those in charge of the meeting are Stanley M. Clarke, Frank B. Ketchum and Michael Hellis.
